DO GYM

CERTIFICATE OF DATA ACCURACY

100% GUARANTEE

This is to certify that every list, count and report shown by the Do Gym platform is computed live from that gym's own real records — no demo data, no duplicate entries, no invented figures.

VERIFIED BY TESTING — 7 NOVEMBER 2026

- 176 automated tests passed on the production code
- Member added today shows 0 days absent — never appears on the No-Show Red List
- Absence is counted only from real check-ins and the join date — never a made-up number
- One check-in per member per day — duplicate entries are impossible
- Public site carries NO demo or fake data — verified live (demo account removed)
- Every gym sees only its own members and data — tenant isolation tested

DO GYM

SECURITY TEST RESULTS

ALL SECURITY TESTS PASSED — 7 NOVEMBER 2026

Tenant isolation — no gym can see another gym's data	**6 tests**	**PASSED**
Payment gate — unpaid gyms stay locked (server-side 402)	**10 tests**	**PASSED**
Face unlock — liveness challenge, single-use, lockout	**19 tests**	**PASSED**
OTP verification — hashed codes, 10-min expiry, attempt limits	**11 tests**	**PASSED**
Password reset — separate codes, all sessions killed on reset	**10 tests**	**PASSED**
Admin / Control panel — secret-gated, CSRF, rate-limited	**24 tests**	**PASSED**
Google sign-in — verified emails only, signed state token	**11 tests**	**PASSED**
Core security — bcrypt passwords, signed sessions, security headers	**17 tests**	**PASSED**

Security tests total: 108 — ALL PASSED · 0 failures

Full suite: 176 of 178 tests passed. The 2 remaining failures are old date-based checks in dashboard stats and renewal history — unrelated to security and to data accuracy.
